LinkedIn: <https://www.linkedin.com/in/tirelo-mputle-70b93986/>

GitHub: <https://github.com/Tirelo-Mputle>

Personal website:

A **frontend web developer** looking to start their carrier with an **entry level position**. Predominately uses the **React library** and **Styled Components** to build projects.

SKILLS

- **React, JavaScript, Styled Components, HTML 5, CSS3**

PERSONAL PROJECT

React Ecommerce website

Description: Multipage Ecommerce website for the Two 14 coffee shop

Live site - <https://two14coffee.netlify.app/>

GitHub - <https://github.com/Tirelo-Mputle/two14-coffee-portfolio-project>

- **Created a multipage Ecommerce website** using React router 6 to navigate between pages.
- Product inventory page contains **single product components** which when clicked, lead to a **single product page** where customers can customize their order.
- Customers can add and remove items from the **shopping cart** which is stored in the local storage.
- Cart contents state is managed using the **useState hook**.

Tools used:

- React library and Styled Components.

Shortly – React Link shortening web application

Description: URL Link shortening web application using the GoTiny link shortener API

Live site - <https://shortly-url-shorter-api.netlify.app/>

GitHub - <https://github.com/Tirelo-Mputle/Shortly---link-shortener>

- **Used API** (GoTiny link shortener) to shorten user inputted long URL link.
- Shortened links are **stored in local storage** and the three most recent results are displayed below the input field.
- Copy of the shortened link is made by clicking the “copy” button.
- Used **Context API** to manage state.

Tools used:

- React library and Styled Components.
